

HICHEM MEZAAD

Data Analyst & Aspiring Data Scientist

Born: August 13, 2005 • Médéa, Algeria • hichemmezaad18@gmail.com • [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

High-achieving 4th-year Data Science and Statistics engineering student at ENSSEA with a rigorous mathematical foundation and practical expertise in data analysis, predictive modeling, and business intelligence. Ranked 1st male student in preparatory studies and 8th nationwide in the competitive ENSSEA admission concours. Proven track record delivering interactive multi-page BI dashboards and classification pipelines.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL Server

Data Science & ML: Pandas, NumPy, Scikit-learn, EDA, Statistical Modeling, Econometrics

Business Intelligence: Power BI, DAX, Advanced Excel, Data Storytelling, KPI Architecture

Tools & Databases: SSMS (SQL Server Management Studio), GitHub Pages, VS Code

EDUCATION

National Higher School of Statistics & Applied Economics (ENSSEA)

2025 – Present

State Engineer / Master's Degree in Statistics & Data Science — Koléa, Tipaza

- **National Entrance Concours:** Ranked **8th** nationwide among only 23 admitted candidates across preparatory classes.
- **Relevant Coursework:** Statistical Inference, Supervised Machine Learning, Multivariate Data Analysis, Econometrics.

Higher School of Management & Digital Economy (ESGEN)

2023 – 2025

Preparatory Cycle in Economics & Management Sciences — Koléa, Tipaza

- **Academic Standing:** Ranked **#1 male student** across all preparatory cohorts.

Ali Ferrah High School — *Baccalaureate in Experimental Sciences*

June 2023

- Graduated with mention **Good** (GPA: **15.64 / 20**).

KEY DATA & ANALYTICS PROJECTS

RetailPulse Analytics & Executive Dashboard | *Power BI, DAX, Data Modeling*

[Live Demo →](#)

- Engineered an end-to-end 4-page interactive business intelligence dashboard examining retail transactions (2022–2024).
- Implemented complex DAX measures for YoY metrics, dynamic profit analysis, customer segmentation, and regional KPIs.

Stroke Prediction Classification Pipeline | *Python, Scikit-learn, Pandas, EDA*

[GitHub →](#)

- Built an end-to-end predictive machine learning pipeline evaluating patient stroke risk factors from clinical datasets.
- Managed data preprocessing, handled severe class imbalance, performed feature scaling, and optimized classification models.

Algeria Sales & Regional Intelligence Dashboard | *Power BI, Advanced Excel*

[GitHub →](#)

- Designed visual reporting systems analyzing commercial performance and revenue distribution across Algerian wilayas.

LEADERSHIP & COMMUNITY INVOLVEMENT

Data Space Scientific Club (ENSSEA) — *Active Member & Organizer*

2025 – Present

- **NeuralX Datathon:** Co-organized the flagship 72-hour datathon at ENSSEA sponsored by AYRADE, AI GRID, and Sourca Algérie.
- **'Next Step' Orientation:** Moderated keynote sessions guiding students into Data Science and Statistics specializations.
- **Manara Event (ENSM):** Represented Data Space in inter-school analytics workshops and networking forums.

LANGUAGES

Arabic: Native • **English:** Professional Working Proficiency • **French:** Full Professional Proficiency
